BRIAN M. O'MALLEY

296 Park Way ● Sometown, NSW 2000 ● Phone: 0400 000 000 ● someone@somedomain.com

Certifications

CISSP, 2008
MCSE, 2008
Security+, 2007

Key Skills

Network & System Security

Risk Management

Vulnerability Assessments

Authentication & Access Control

System Monitoring

Regulatory Compliance

System Integration Planning

Multitier Network Architectures

Education

University of Australia
BS in Computer Science, 2000

INFORMATION SECURITY SPECIALIST

Multicertified Expert in Enterprise Security Strategies

Infosec specialist whose qualifications include a degree in computer science; CISSP, MCSE and Security+ designations; and detailed knowledge of security tools, technologies and best practices. Nine years of experience in the creation and deployment of solutions protecting networks, systems and information assets for diverse companies and organizations.

Technology Summary

Security Technologies:	Retina Network Security Scanner; SSH; SSL; Digital Certificates; Anti-Virus Tools (Norton, Symantec, Ghost, etc.)
Systems:	Unix-Based Systems (Solaris, Linux, BSD); Windows (all)
Networking:	LANs, WANs, VPNs, Routers, Firewalls, TCP/IP
Software:	MS Office (Word, Excel, Outlook, Access, PowerPoint)

IT Experience

XYZ Co, Example City	**Information Security Consultant,**	2009-Present
ABC Co, Example City	**Senior Information Security Specialist,**	2004-2008
123 Co, Example City	**Information Security Specialist,**	2002-2004
R&R Ltd, Example City	**Network Administrator,**	2000-2002

Became an expert in information systems security for multiple clients and employers. *Recent Project Highlights*:

- **Economic Recovery:** Currently directing the information security portion of major system implementations linking schools, universities, libraries and hospitals nationwide into shared networks. Devised enterprise security strategies safeguarding information assets and ensuring compliance with regulatory mandates.

- **Government Sector:** Assisted in the development and launch of secure, recoverable and fault-tolerant systems for data access and identity management for dozens of state and federal government agencies.

- **Financial Sector:** Led business-critical information security initiatives for large financial institutions involving encryption of customer data to ensure compliance with change in federal laws.

- **Fortune 500 Sector:** Modernised outdated information security awareness programs for several F500 corporations, and led companywide training on crucial new infosec policies, procedures and technologies.

- **Infrastructure:** Led comprehensive security infrastructure upgrades (e.g., firewall/VPN upgrades, intrusion detection, token-based authentication and remote management) for various midsize and large companies.

- **Risk Management:** Protected vulnerable networks following detailed risk assessments. Guided cross-functional teams in the design, validation, acceptance testing and implementation of secure, networked communications across remote sites for several key clients.

Able to Relocate & Travel Extensively ● Available for Full-Time & Contract Assignments
